The Pan Arab Journal of Rhinology (PAJR), the official journal of the Pan Arab Rhinology Society (PARS), has achieved a lot within the last few years. The PAJR is now online, double blind, peer reviewed, and widely distributed amongst rhinologists all over the world. It accepts only high quality articles in all fields of rhinology including; inflammation, infection, allergy, congenital diseases, trauma and tumors of the nose and paranasal sinuses. All related other specialties are also well appreciated including radiology, pathology, oncology, pediatrics, internal medicine and pulmonology, etc. The PAJR covers all fields of rhinology including open and endoscopic surgery, snoring and OSA (obstructive sleep apnea), rhinoplasty, maxillofacial, allergy, smell and pharmacotherapy.

We feel so sorry for those who had their articles rejected and we do encourage them to resubmit their distinguished work in the near future.

The big progress in the march of the PARS is the distinguished success of the 12th PARS and 27th RhinoEgypt conference. It was arranged on hybrid format and attended by more than 2000 participants from more than 65 countries. Most distinguished rhinologists from all over the world shared their most recent work in the conference. It was a true model of how to handle matters during the difficult time including COVID-19 pandemic.

We, as a board of the PAJR, do express our deepest gratitude to all our colleagues who participated in the success of both the PARS and the PAJR.
