EDITORIAL

Editorial Letter

Reda Kamel*, Ahmed El-Farouk

The PARS, Cairo University, Cairo, Egypt

On behalf of the editorial board of the Pan Arab (PAJR) Journal of Rhinology, it is our great pleasure to announce that this is the first issue of PAJR which is hosted by Digital Comments - Elsevier. Now the PAJR website offers professional easy well-ordered submission, reviewing and publication facilities. Looking forwards to achieving high citation scores at Scopus, Web of Science and PubMed.

We are pleased that the coming International Federation of Otorhinolaryngology Societies Conference (IFOS), January 2023 will be held in Dubai. This is a big achievement of all Otorhinolaryngology physicians in the Arab Countries. We expect it to be a distinguished event and a big success.

Next March RhinoEgypt will celebrate its 29th anniversary. It will continue the dissemination of current trends of best management of most diseases in the fields of rhinosinusitis; allergic and

nonallergic rhinitis; snoring and obstructive sleep apnea; olfactory and taste dysfunction; paranasal sinus tumors; sinonasal surgeries; facial plastic and reconstructive surgery.

It is worthy to mention that volume II of the Adapted Egyptian Best Practice Guidelines of Otorhinolaryngology Audiovestibular and Phoniatics (ECPG-ORLAP) is being finalized. It is the fruit of cooperation of more than 300 ORLAP professionals from all governmental and non-government institutions in Egypt. The aim of work is to achieve common language amongst all ORLAP doctors working in patient care and to be suitable and fitting with both patient's culture and institutional facilities.

Conflict of interest

None declared.

Received 30 July 2023; accepted 30 July 2023.
